

Rapid Test

One-step immunochromatographic tests

Fast | Easy | Reliable | Simple

Certest Immunodiagnostic is committed to providing a comprehensive portfolio of diagnostic reagents for detecting infectious diseases and different markers, covering different needs of formats, types of use, throughput, precision, and time from sample to result.

IMMUNOCHROMATOGRAPHY

provides rapid test solutions for aiding the professional of diagnostic with an immediate solution, needing no equipment, and having results usually in less than 15 minutes.

TURBIDIMETRY

provides diagnostics solutions for automated and quantitative results and higher throughputs.

CLIA provides a high sensitivity, automated diagnostic solution based on the chemiluminescent amplification of an immunocapture.

Rapid Test

Our products are the result of years of experience detecting the presence of antigens with the lateral flow **immunochromatographic** technique.

The devices are based on the coloured latex particles. Showing results on bands of different colours facilitates the interpretation of the result.

Certest Lateral Flow Immunochromatography portfolio mainly covers the diagnostic of the gastrointestinal, respiratory infectious diseases and the detection of inflammatory or tumor markers in the Gastrointestinal tract.

- ✓ **Single device**, multiple tests from one sample.
- ✓ **One sample**, one preparation, panel testing.
- ✓ Multiple analytes diagnosed in **10 minutes**.
- ✓ **Reduced risk** of sample and result mishandling.
- ✓ Operational efficiency.

Multianalyte COMBO (1, 2, 3 or 4 strips)

Our cut-off tests are equipped with special vials which facilitates fecal sample collection.

Advantages:

Noninvasive diagnostic

All included. No additional equipment needed

Low operational costs

Immediate results

Ease of use and interpretation

Certest Immunodiagnostic offers simple, sensitive, specific screening assays for a presumptive diagnosis of infectious diseases.
